

Rapid Deployment Systems

Easy, under 10 minute installation.

- Live video emergency management collaboration
- Fast disaster, hazardous incident and police activity response
- Time-lapse documentation for reference
- Password-protected camera activation and control
- Remote observation on mobile devices
- Traffic management in temporary situations

Reduce patrols and manage security with multiple remote webcam views in a central location or on portable mobile devices. Full motion live observation enables rapid response and the detailed image archiving delivers incident verification and documentation.
